

Who is WES

Since 1981, Worldwide Environmental Services, (Now WES) provides clients with services that improve energy efficiency, reduce costs, and enhance resiliency. Our years of expertise and defined knowledge are applied and tailored to match the challenges of today's ever evolving business climate.

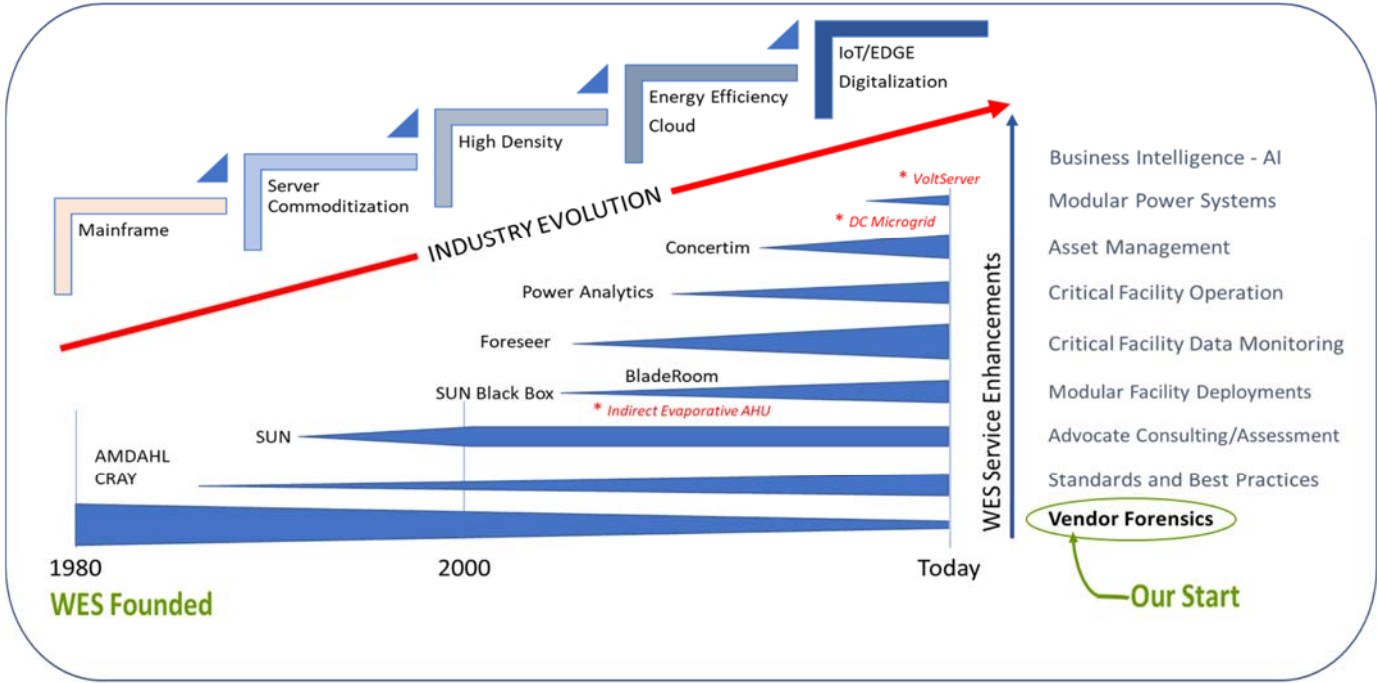

Our Mission

Provide our valued clients with fact based, objective information to enhance the efficiency, performance, reliability, and resilience of mission critical facilities.

Formed with a solid foundation to solve problems sitting in the gap between the critical facility and the information technology equipment, we have adapted to grow and change with evolving systems and technology.

We continue to apply our know-how and experience to the many complex issues facing those who own high value facilities and whose failure or disruption will cause a damage or failure in business operations or loss of life.

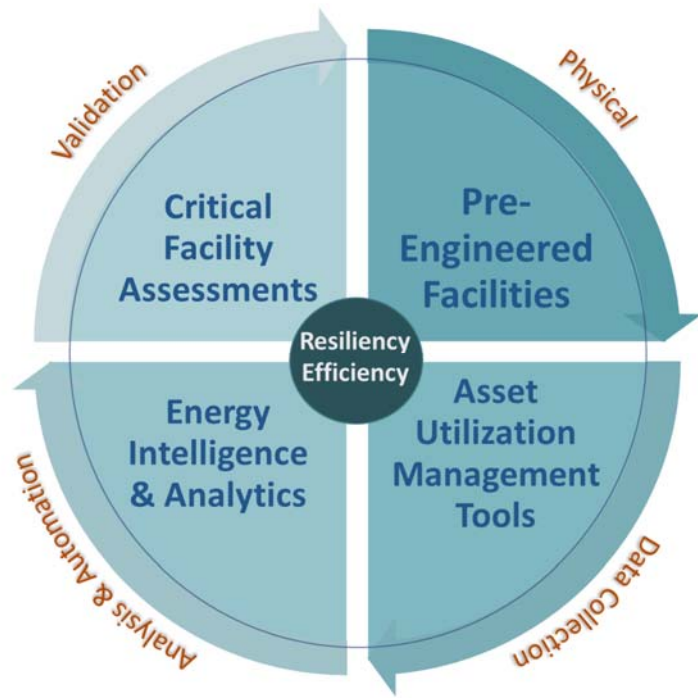

Our History

Our Offerings

WES provides services, products, and solutions in four unique, yet complementary areas, all of which drive **Resiliency** and deliver far greater **Efficiency**.

- Enhance Resiliency
- Provide Real Time Reporting
- Avoid Downtime and Failures
- Optimize Energy Efficiency and Reduce Costs
- Proactively Respond To Loss of Services
- Avoid Crisis Management Costs
- Maintain Services
- Create CI Data Intelligence Asset
- Model Emergency Operating Modes
- Capacity Planning
- Improve Deployment

Our Charge

To value our long term relationships in order to provide our clients direct lines to development and engineering resources, ensuring the best product knowledge and successful deployments. To help in shaping standards and guidelines driving the future of the industry and allowing our clients to stay informed on the front end of technology changes.

We desire provide the knowledge our clients need for them to make informed decisions.

About us
